

# Mobile Link™

4G LTE CELLULAR

Get connected  
with a Mobile Link  
4G LTE accessory.

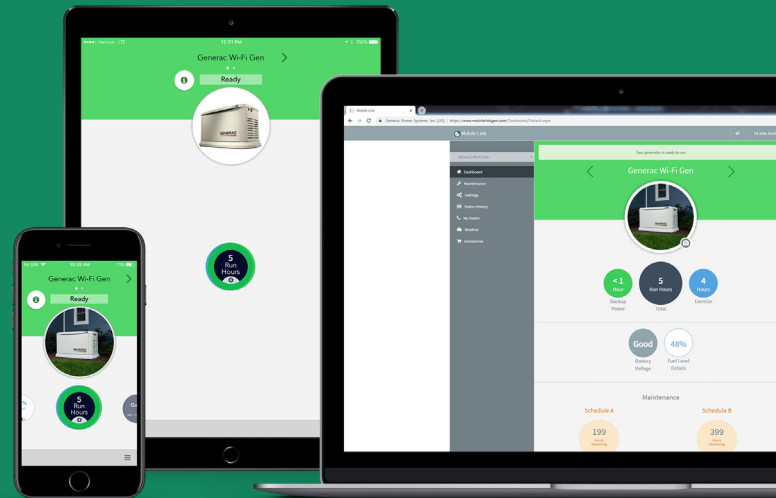

# Get Connected.

Introducing Mobile Link Cellular 4G LTE, the next generation cellular accessory. This accessory attaches to your home standby generator and connects it with our Mobile Link monitoring service, giving you (and your service dealer, with a dealer-managed plan) real-time access to critical information about your generator's status - anytime, anywhere. The Mobile Link Cellular 4G LTE accessory is easy to use and works in tandem with our cellular partner, Verizon, for broad coverage and more reliable connections. This 4G LTE network also delivers faster download speeds, enabling automatic generator system upgrades and faster delivery of generator condition notifications.

# What can a Mobile Link 4G LTE accessory do for you?

Once you're connected to the Mobile Link service, you can monitor the status of your generator wirelessly, through the Mobile Link mobile app or at [MobileLinkGen.com](http://MobileLinkGen.com). You can receive real-time status updates, see your maintenance needs and schedule, and contact your service dealer directly.

For additional peace-of-mind, you can sign up for a dealer-managed plan, which automatically provides your service dealer access to notifications when service is required or a problem occurs – 24/7, 365 days a year.

## KEY FEATURES

Get real-time notifications about your generator

View your maintenance needs

Remotely access your generator's health

# Easy set-up

---

Connect your generator in just three quick steps.

- 1 Install your Mobile Link 4G LTE accessory to your compatible standby generator.
- 2 Set up a Mobile Link account at [MobileLinkGen.com](http://MobileLinkGen.com) or contact your service dealer to set up a dealer-managed plan.
- 3 Monitor the status of your generator – anytime, anywhere – through the Mobile Link mobile app or at [MobileLinkGen.com](http://MobileLinkGen.com).

# Who should upgrade?

---

The 4G LTE accessory is the perfect device for homeowners who have no access to Wi-Fi service, have unreliable internet service from their Internet Service Provider, or who prefer the reliability of a cellular connection. It can be installed on any Generac, Honeywell, Eaton or Siemens air-cooled or liquid-cooled home standby generator up to 150kW, 2010 or newer.

*(PowerPact models not supported)*

# Get 24/7 peace-of-mind

Once you're connected to the Mobile Link service, you can increase your generator's reliability even further by signing up for a dealer-managed plan. When you sign up for a dealer-managed plan, your service dealer will have access to real-time notifications whenever maintenance is required or a problem occurs. With a dealer-managed plan, your generator is always ready to go, without you needing to lift a finger.

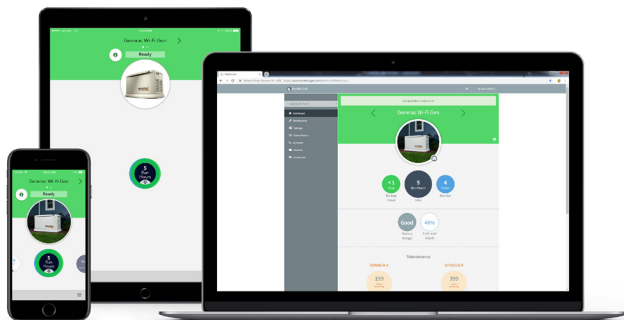

## How to sign up for a dealer-managed plan

- 1 Talk to your service dealer about setting up a dealer-managed plan.
- 2 Once you have agreed to a plan through your dealer, you will receive a confirmation request email from Mobile Link.
- 3 Log in to your Mobile Link account with the credentials provided in the confirmation email. Be sure to change your password once you've gained access.
- 4 Congratulations! Your dealer-managed plan has been set up. Your generator is now being monitored by your service dealer and they will instantly know if a problem occurs.

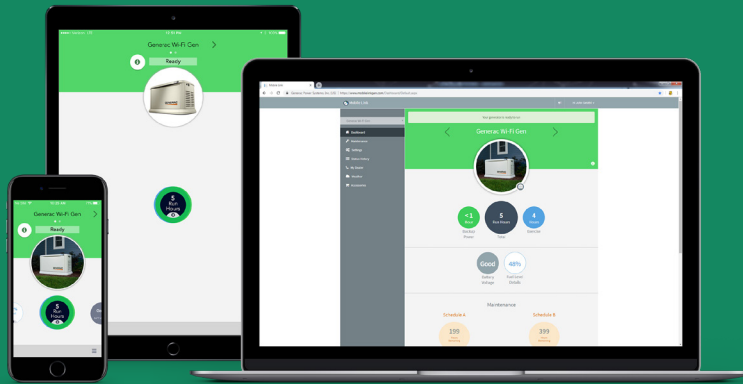

# Subscription plans designed for you
